INDEX

S.No	Name Of Practical	Submission Date	Remark
1.	Design a professional resume using templates.	22-09-2025	
2.	Create a Career Oriented Presentation with 7 slides using transitions and animations.	29-09-2025	
3.	Create a social media poster for "DIGITAL AWARENESS WEEK" using canva.	01-10-2025	
4.	Compose & send a professional email with an attachment as "you are applying for an internship, send email to HR with your resume attached".	06-10-2025	
5.	Design a complete Google Form survey and analyze responses. a) Create a Google Form titled "Student Attendance Report". b) Include the following question types: a. 5 MCQs b. 1 Rating scale (1–5) c. 1 Short answer d. 1 Checkbox question c) Customize the theme (header image + color). d) Share the form link with 5 friends and collect responses. e) Generate charts from responses and take screenshots of the analysis page.	11-10-2025	
6.	Demonstrate the creation and management of your digital identity. a) Create a social media profile (LinkedIn preferred). b) Add a profile photo, short bio, skills, and education details. c) Create a simple post about "My Learning Journey in Digital Literacy."	31-10-2025	

	d) Change your privacy settings to: a. Who can see your posts. b. Who can message you		
7.	Using Google Drive or OneDrive: a) Create a new folder named "Unit 3 Practical Work". b) Upload 3 different files (PDF, image, document). c) Organize them in subfolders: Notes, Images, Assignments. d) Share the main folder with your teacher with View Only permission.	13-11-2025	
8.	Identify one real phishing email : A final-year student, Aman, receives a LinkedIn message saying: "You are shortlisted for a Remote Software Developer role at Google. Salary: ₹18 LPA. Pay ₹2,499 as verification fee. Limited seats. Pay now to confirm." <u>ANSWER THE QUESTIONS :-</u> a) What type of cybercrime is happening here? b) List 3 red flags that show it is a scam? c) What should he do to verify if a job offer is real?	19-11-2025	
9.	Create a Google Form Quiz with the following requirements: a) Convert the form into a Quiz mode with automatic grading. b) Add 5 MCQ questions, each carrying 2 marks. c) Add 1 short answer question that requires manual evaluation. d) Turn ON the setting: a. <i>Limit to 1 response</i> b. <i>Shuffle question order</i> c. <i>Release marks after manual review</i> e) Add a timer add-on (like form presenter) and set up a 10-minute time limit.	24-11-2025	

	a) Upload multiple sources (any 2) such as: i. PDF notes ii. Web articles iii. Text copied into NotebookLM b) Ask NotebookLM to: i. Create a combined study guide using all sources. ii. Generate flashcards for quick revision. iii. Create a concept map or explanation of the topic. c) Manually check for: i. Any incorrect facts ii. Repeated information iii. Missing important points d) Attach 3 screenshots from NotebookLM: i. Combined study guide ii. Flashcards iii. Concept map / explanation		
13.	Create a complete Student Result Management workbook. a) Create a new workbook with 3 sheets renamed as: a. <i>Student_Data</i> b. <i>Marks_Analysis</i> c. <i>Charts</i> b) In <i>Student_Data</i>, enter a list of 15 students with: Name, Roll No, Class, City, Subject1, Subject2, Subject3. c) Use Flash Fill to split "Full Name" into "First Name" and "Last Name". d) Use Find & Replace to replace city name "Delhi" with correct "Delhi". e) Use IF function to calculate Pass/Fail (Pass = total $\geq$ 120). f) Use COUNTIF to find how many students belong to "Delhi". g) Use AVERAGE, MAX, MIN to analyze marks in the <i>Marks_Analysis</i> sheet.	19-12-2025	

	h) On the <i>Charts</i> sheet, create: i. A Bar Chart showing marks of any one subject. ii. A Pie Chart showing percentage of pass vs fail. i) Apply Conditional Formatting to highlight marks < 40 in red. j) Convert the table into a formatted Excel Table.		
14.	Build a workbook for managing and analyzing sales data of a small store. a) Create a workbook with sheets: I. <i>Store_Sales</i> II. <i>Summary</i> III. <i>Charts</i> b) Import a CSV sales file (or create a sample table) containing: Date, Product, Category, Quantity, Price, Total Sales. c) Use Sort (A→Z, Z→A) to organize products by name and category. d) Apply Filter to view only “Electronics” category. e) Use SUMIF to find total sales for a selected product (e.g., “Headphones”). f) Use LEFT, RIGHT, MID to extract: I. First 3 letters of the product name II. Last 2 letters of the category g) Find the highest and lowest sales value using MAX/MIN. h) Prepare a monthly sales summary in the <i>Summary</i> sheet using AVERAGE & SUM. i) Create a Line Chart of month-wise total sales in the <i>Charts</i> sheet.	24-12-2025	

	j) Apply sheet protection so data cannot be edited accidentally.		
15.	Create a complete personal financial planner workbook. a) Create and rename sheets as: <i>Expenses</i> <i>Budget</i> <i>Charts</i> b) Enter at least 20 rows of expense data: Date, Category, Expense Detail, Amount, Payment Method. c) Use Data Validation dropdown to create a category list (Food, Travel, Fees, Shopping, Other). d) Use Remove Duplicates on the Category column if repeated incorrectly. e) Use SUMIF to calculate total spending for each category. f) In the <i>Budget</i> sheet, create the monthly budget and compare with actual expenses using: Difference = Budget – Actual (formula required) g) Highlight expenses above ₹2000 using Conditional Formatting. h) Create: - A Pie Chart showing category-wise spending - A Bar Chart comparing <i>Budget vs Actual</i> - Use Flash Fill to separate date into Day / Month / Year if needed. Also explain its detail - Save worksheet in Page Layout view and adjust print area.	29-12-2025	

Practical 1: Design a Professional Resume

Aim - To design a professional resume using online templates.

Objectives

- To understand professional formatting of resumes
- To identify key resume components
- To export resume in PDF format

Procedure

Open the Resume-Designing Application

Start by launching **Canva**, **Google Docs**, or **MS Word** on your computer.

- If using Canva, log in with your account and go to the Templates section.
- If using Google Docs, open a new document through Google Drive.
- If using MS Word, open the application and select “New Document.”

1. Browse and Select an Appropriate Resume Template

Navigate to the resume template section. Browse through various designs and choose a template that matches a **professional look**, preferably clean, simple, and easy to read.

- Canva offers a wide range of modern templates.

- Google Docs provides basic but neat resume layouts.
- MS Word includes both modern and classic templates.

2. Enter Personal Information

Replace the sample text in the template with your **personal details**, such as:

- Full Name
- Contact Number
- Email Address
- Address (optional)
- LinkedIn or portfolio links (if applicable) Ensure the information is accurate and formatted consistently.

3. Add Academic Details

Insert your educational background in the provided section of the template. Include:

- Course/Program Name
- Institution Name
- Duration (Year of study)
- Grades or CGPA (if required)
Arrange information in **reverse chronological order** (most recent first).

4. Write a Career Objective

Add a short, clear career objective highlighting your goals, strengths, and professional aspirations.

Keep it concise (2–3 lines) and tailored to the field you are applying for.

5. Include Skills and Achievements

Create a section for **skills**, both technical and soft skills.

Examples:

- Technical skills (e.g., MS Office, programming languages)
- Soft skills (e.g., communication, teamwork)
Add any **academic achievements, certificates, awards, or projects** relevant to your profile.

6. Format the Resume Professionally

Adjust the text formatting to ensure clarity and readability:

- Use **headings** for each section (e.g., Education, Skills, Objective).
- Use **bullet points** to list items cleanly.
- Maintain consistent **font style, size, and alignment** throughout.
- Ensure proper spacing and margins for a neat layout.
Review the resume for grammatical correctness and visual balance.

7. Preview and Make Final Adjustments

Scroll through the entire resume to check layout alignment, spacing, colors, and text placement.

Make sure the document looks uniform and professional before exporting.

8. Export the Resume in PDF Format

Once the final layout is ready, export or download the document as a **PDF file**, which preserves formatting.

- In Canva, click **Download → PDF Print**.
- In Google Docs, go to **File → Download → PDF Document**.
- In MS Word, select **File → Save As → PDF**.

Output –

SHREYA NISHAD

Contact Us

Phone

7067379287

Email

nshreya483@gmail.com

Address

Gejamuda, Raigarh (C.G)

TECHNICAL SKILLS

- Programming Languages :- C, Python, Java(basis)
- Web Technologies :-HTML, CSS, Javascript
- Tools & Platforms :- VS code, Canva

SOFT SKILL

- Time management
- Communication Skills
- Problem sloving & logical learning
- Creativity
- Team collaboration

Career Objective

To build a strong foundation in computer science and develop practical skills through academic learning and real-world projects.

Education

Rungta International Skills University
(2025-29)

Btech in Computer Science and
Engineering

Achievments

Participated in inter-college sports competition and represented the college with team spirit.

Secured good academic performance in higher secondary education.

Interests

- Coding and problem solving
- Web development and design
- Participating in technical events and hackathons

Practical 2: Career~Oriented Presentation

Aim - To create a career presentation using slides, transitions, and animations.

Objectives

- To design a multi-slide professional presentation
- To apply transitions and animations

Procedure

Open a blank presentation

Launch PowerPoint/Google Slides and select the option to create a new blank presentation.

This opens a fresh workspace where you will design your slides.

Create a title slide

Insert a title slide layout and add the presentation title along with your name or subtitle.

Ensure the title is clear, readable, and visually centered on the slide.

Add minimum 7 slides

Use the “New Slide” option to insert at least seven additional slides with appropriate layouts.

Each slide should focus on a single topic or idea for clarity.

Insert images, icons, and bullet points

Add relevant images and icons to visually support your content.

Use bullet points to present information in a structured and easy-to-read format.

Apply a theme

Choose a professional theme from the design options available in the software.

The theme will automatically set consistent fonts, colors, and backgrounds.

Add transitions and animations

Apply slide transitions for smooth movement between slides. Add animations to text or images to enhance the presentation without overusing effects.

Output :-

“WHO IS A SOFTWARE ENGINEER”

Designs and Develop Software

Creates applications that helps users and business perform tasks.

Applies Programming to Solve Problem

Using coding languages like C, Java, Python to build functional solutions.

Works in Web, App, and AI fields

Develops websites, mobile apps, and smart systems using modern technology.

Ensure Software is Efficient and Secure

Tests and maintains software to ensure quality, performance, and safety.

“Software Engineers blend creativity and logic to shape the digital world”

“EDUCATIONAL QUALIFICATIONS”

High School

Choose the Science stream(PCM) to build strong logic, analytical, and computer basics.

Bachelor's Degree

Pursue Computer Science or IT. Learn programming, data structures, and algorithms.

Certificates and Training

Take online course and internships in AI, Web Development, Cloud, or App Design to enhance skills.

“Education : The Foundation of a Software Engineer’s Journey”

KEY SKILLS REQUIRED FOR A SOFTWARE ENGINEER

Programming Skills

Strong command over languages like C, C++, Java or Python to develop efficient and scalable software solutions.

Problem solving

Analyze complex problems, design algorithms, and find innovative and optimized solutions.

Teamwork and Communication

Collaborate effectively with teammates and communicate ideas clearly during projects.

Creativity and Adaptability

Stay updated with the latest technologies and quickly to new challenges.

“Essential skills to grow as s software engineer”

Additional Certifications

Learn programming languages like C, Java, Python and get certified in Web/App Development or Data Structure

Undergraduate Degree

Pursue BTech/B.E in CSE, IT, or Software Engineering for core technical knowledge.

1

Foundation (school level)

Focus on Maths ,Physics & Computer Science to develop logical & analytical thinking.

3

2

4

Higher Studies/Specialization

Go for M. Tech, M.S, or specialized courses in AI, Data Science, or Cybersecurity for advanced roles.

EDUCATIONAL PATHWAY FOR A SOFTWARE ENGINEER

STEPS TO BECOME A SOFTWARE ENGINEER

“Roadmap to a successful Tech Career”

Learn the Basics

Start with Programming fundamentals in C, C++, or Python and understand logic building.

Build Technical Skills

Practice data structure, algorithms, web/app development, and real projects.

Gain Experience & Grow

Join internships, contribute to open-source, and keep learning new technologies.

“MY VISION AS A SOFTWARE ENGINEER”

“Building innovative software that makes life easier and smarter”

Continuous Learning

Keep Improving skills and exploring new technologies to stay updated in the software field.

Innovation & Creativity

Build software solutions that simplify lives and solve real-world challenges.

Career Growth & Impact

Work with leading tech companies and contribute to projects that make a positive global impact.

Practical 3: Digital Awareness Poster in Canva

Aim - To design a poster for Digital Awareness Week using Canva.

Objectives

- To apply design tools
- To create a visually appealing poster

Procedure

Login to Canva

Open Canva in your browser and sign in using your email or Google account.

This gives you access to all templates, design tools, and editing features.

Select poster layout

Search for “Poster” in the template section and choose a suitable layout.

This layout provides a ready-made design structure to begin your poster.

Add “Digital Awareness Week” text

Insert a text box or edit the existing heading and type “Digital Awareness Week.”

Adjust the font style, size, and alignment to make the title prominent.

Insert icons and graphics

Go to the “Elements” tab to add icons, shapes, and relevant graphics. Position them creatively to enhance the visual appeal and message of the poster.

Apply suitable colors

Choose a color theme that matches the topic and improves readability.

Use consistent color combinations for background, text, and elements.

Download final poster

Click the “Download” button and select the preferred file type, usually PNG or PDF.

Save the poster to your device for printing or sharing

Output :-

DIGITAL AWARENESS WEEK

Empowering You to Stay Safe
& Smart Online!

- Learn about Online Safety
- Understand Digital Footprints
- Protect Your Privacy

#ThinkBeforeYouClick #DigitalAwarenessWeek

Join the Campaign & Stay Digitally Smart!

25th – 31st October 2025

Practical 4: Professional Email (Internship Application)

Aim - To draft and send a professional internship email with attachment.

Objectives

- To compose a professional email
- To attach documents

Procedure

Open Gmail

Go to the Gmail website or app and log in with your email account. This opens your inbox where you can create and send emails.

Click Compose

Select the “**Compose**” button to open a new email window. A blank message box will appear on the screen.

Write subject line

Enter a clear and concise subject that reflects the purpose of the email.

This helps the recipient understand the message at a glance.

Write professional message

Type a polite, well-structured message addressing the recipient formally.

Keep the tone respectful and include necessary details or requests.

Attach resume

Click the **attachment (paperclip)** icon and select your resume file from your device.

Ensure the resume is in PDF format and properly named.

Send email

Review the email for accuracy and ensure attachments are included.

Click **“Send”** to deliver the message to the recipient

Output :-

Practical 5: Create Google Form – Attendance Report

Aim - To design a Google Form and analyze responses.

Objectives

- To create form with multiple question types
- To collect sample responses
- To analyze responses

Procedure

Create new Google Form

Open Google Forms from your Google account and click “**Blank Form**” to start a new form.

This opens an empty form where you can add questions.

Title it “Student Attendance Report”

Enter the title at the top of the form and add a short description if needed.

This helps respondents understand the purpose of the form.

Add MCQs, rating, checkbox and short answer

Use the question type menu to insert multiple-choice questions, rating scales, checkboxes, and short-answer fields.

Arrange the questions in a logical order for easy response.

Customize theme

Click the **Theme** icon to change colors, fonts, and header images.

This improves the appearance and makes the form visually appealing.

Share form and collect responses

Use the **Send** button to share the form via link, email, or QR code.
Allow participants to submit their responses through any device.

View summary charts

Go to the **Responses** tab to see automatic charts and graphs generated by Google Forms.

These visual summaries help you quickly analyze the collected data.

Take screenshots

Capture screenshots of the form, responses, and charts for documentation.

Save them for use in reports or practical records.

Output :-

The screenshot displays a Google Forms interface in a web browser. The address bar shows the URL: docs.google.com/forms/d/1rd_dfmDRRf0MwPP1U1ZGeYQQp4iOIU1YaYkmvbg7a0/edit. The form is titled "NALS MCQ Test" and includes a note: "It is compulsory to answer to all the questions". The form contains two multiple-choice questions:

1. Which of the following best defines a computer?
 - ☐ a) A device for entertainment
 - ☐ b) An electronic device that processes data
 - ☐ c) A mechanical calculating machine
 - ☐ d) A device used only for the internet
2. Which device is an input device?
 - ☐ a) Scanner
 - ☐ b) Monitor

The interface includes a top navigation bar with tabs for "Questions", "Responses" (indicated by a notification badge), and "Settings". A "Published" button is visible on the right. A vertical toolbar on the right side of the form allows for adding, deleting, and duplicating questions.

Practical 6: Create Digital Identity – LinkedIn

Aim - To create and modify digital identity using LinkedIn.

Objectives

- To create professional online profile
- To update personal information

Procedure

Create LinkedIn profile

Sign up on LinkedIn using your email and set up a new profile. This gives you access to professional networking and career-building tools.

Add photo, bio, education

Upload a clear professional photo and write a short bio summarizing who you are.

Enter your educational details to complete your basic profile information.

Add skills

Use the “Skills” section to list your technical and soft skills.

Adding relevant skills increases your visibility and strengthens your profile.

Create a simple post

Click “Start a Post” and write a short, meaningful update or introduction.

Share it publicly to begin engaging with your professional network.

Change privacy settings

Go to **Settings & Privacy** to adjust what others can see on your profile.

Modify visibility, contact preferences, and data-sharing options as needed.

Ouput :-

Practical 7: Using Google Drive / OneDrive

Aim - To upload and organize files in cloud storage.

Objectives

- To manage files online
- To share files securely

Procedure

1. Create folder “Unit 3 Practical Work”

Open Google Drive or your file manager and create a new folder named “**Unit 3 Practical Work.**”

This folder will store all files related to the practical.

2. Upload documents

Click the **Upload** option and select the required documents from your device.

The files will be saved inside the main folder for easy access.

3. Create subfolders

Inside the main folder, create additional subfolders to categorize your documents.

This helps keep your work organized and easy to locate.

4. Share main folder with View only

Right-click the folder, choose **Share**, and set the permission to **View only** for others.

This allows people to see the contents but prevents them from editing or deleting files.

Output :-

The screenshot displays the Google Drive web interface. The browser's address bar shows the URL: `drive.google.com/drive/u/0/folders/17uiR08i8TikbvxSeBDFsnF6l_8oZb2CW`. The left sidebar contains navigation options: Home, My Drive, Computers, Shared with me, Recent, Starred, Spam, Bin, and Storage. The main content area shows the 'Unit 3 Practical Work' folder, which contains three subfolders: 'Assignments', 'Images', and 'Notes'. Each folder is owned by 'me' and was last modified at 09:55, 09:54, and 09:55 respectively. The bottom of the screen shows a Windows taskbar with the date and time set to 10:05 AM on 04-12-2025.

Name	Owner	Date modified	File size	Sort
Assignments	me	09:55 me	—	⋮
Images	me	09:54 me	—	⋮
Notes	me	09:55 me	—	⋮

Practical 8: Identify Phishing Attack

Aim - To identify phishing attempts through digital messages.

Objectives

- To detect cybercrime
- To recognize scam elements

Procedure

Read message text

Carefully go through the entire message to understand its content and intent.

Make note of any unusual requests or unfamiliar senders.

Identify suspicious elements

Look for spelling errors, urgent demands, unknown links, or too-good-to-be-true offers.

These signs often indicate potential scams or malicious intent.

List cybercrime type

Based on the suspicious elements, categorize the message as phishing, fraud, malware attempt, etc.

This helps in understanding the nature and threat level of the cybercrime.

Write verification steps

Suggest ways to confirm authenticity, such as checking the sender's email, contacting the official source, or scanning links.

These steps help prevent falling victim to cyberattacks.

Aim: Identify one real phishing email:

A final-year student, Aman, receives a LinkedIn message saying:

“You are shortlisted for a Remote Software Developer role at Google.

Salary: ₹18 LPA.

Pay ₹2,499 as verification fee.

Limited seats. Pay now to confirm.”

ANSWER THE QUESTIONS:-

1. What type of cybercrime is happening here?

Ans) This is an example of a Phishing Scam / Fake Job Scam. The attacker is trying to cheat the victim by offering a fake job and asking for money.

2 . List 3 red flags that show it is a scam.

Ans) 1) Asking for money for job verification (real companies never ask for payment).

2) Unrealistic salary offer (₹18 LPA for a remote job without an interview).

3) Urgency and pressure like “Limited seats” and “Pay now”.

3 . What should he do to verify if a job offer is real?

Ans) 1) Check the official Google Careers website.

2) Verify the sender’s email or LinkedIn profile.

3) Contact the company through official HR channels.

4) Never pay any money for job confirmation.

Practical 9: Google Form Quiz with Timer

Aim - To create a quiz with automatic grading and time limit.

Objectives

- To automate quiz assessment
- To use time limit add-on

Procedure

1. Create Google Form – Open Google Forms and start a new blank form to set up the structure of your activity.
2. Convert to quiz – Enable “Make this a quiz” in the settings so you can assign points and correct answers.
3. Add 5 MCQs + 1 short answer – Insert five multiple-choice questions and one short-answer question, customizing options and points.
4. Enable 1-response limit – Turn on “Limit to 1 response” so each user can submit the form only once.
5. Shuffle questions – Activate the shuffle feature to randomize the order of questions for every respondent.
6. Add timer add-on – Install a timer add-on from the Add-ons menu to set and control the quiz duration.

7. Send link – Use the “Send” button to generate and share the form link with participants.

Output :-

The screenshot shows a Google Forms interface for a quiz titled "NALS QUIZ". The form has a header with the text "QUIZ TIME!" in a stylized font. Below the header, there is a section titled "NALS QUIZ" with a sub-header "It is compulsory to answer all the questions". The first question is "1 . Which of the following best defines a computer? *". It has three multiple-choice options: a) A device for entertainment, b) An electronic device that processes data, and c) A mechanical calculating machine. The form is titled "Untitled form" and has a "Total points: 9" indicator.

The screenshot shows the continuation of the Google Forms quiz. The second question is "2 . Which device is an input device? *". It has four multiple-choice options: a) Scanner, b) Monitor, c) Speaker, and d) Printer. The third question is "3 . Android OS is primarily used in: *". It has four multiple-choice options: a) Desktop computers, b) Supercomputers, c) Smartphones, and d) Servers. The form is titled "Untitled form" and has a "Total points: 9" indicator.

Practical 10: AI Text Bias & Plagiarism

Aim - To analyze AI generated text for plagiarism and bias.

Objectives

- To detect biased statements
- To improve writing

Procedure

1. Generate paragraph from AI – Use an AI writing tool to produce a clear, coherent paragraph on your chosen topic.
2. Check plagiarism – Run the paragraph through a plagiarism checker to ensure originality and proper attribution.
3. Check grammar – Review the text with a grammar tool to correct errors in punctuation, spelling, and sentence structure.
4. Identify biased statements – Examine the content for subjective language, assumptions, or one-sided viewpoints.
5. Rewrite neutrally – Revise the paragraph to remove bias, ensuring the tone is balanced, objective, and fact-based.

Output :-

The screenshot shows the JustDone Plagiarism Checker interface. At the top, the navigation bar includes links for Plagiarism Checker, AI Humanizer, AI Detector, AI Tools, and Pricing, along with a 'Try JustDone' button. The main heading is 'Plagiarism Checker by JustDone' with the tagline 'Easily spot and correct plagiarism to make sure that your work is one-of-a-kind.' Below this, a red banner indicates a 'High plagiarism level'. The main text area contains a paragraph about online and offline learning. To the left, a bar chart shows the 'Average plagiarism level' at 74%, with 42% for 'Minor changes' and 18% for 'Identical' content. A 'Remove Plagiarism' button is prominently displayed, and a green checkmark indicates 'Get 100% plagiarism-free text'.

The screenshot shows the Grammarly interface for an 'Untitled document' with an '83 Overall score'. The main text area contains a paragraph about online and offline learning, with several words and phrases highlighted in blue, indicating potential issues. On the right, a sidebar titled 'Review suggestions' shows a 'Pro suggestion' with a '2 free samples left today' banner. The suggestion text reads: 'Online learning and offline learning both have their own benefits, so one neither cannot can be called considered completely better than the other.' Below this, there are options to 'Use this version', 'Dismiss', or 'Choose a synonym learning'. The bottom of the interface shows a word count of '103 words' and a system tray with weather and time information.

Biased Statements Found:

“Online learning is better for college students.” This is an over-generalization.

“Online classes offer flexibility and comfort for everyone.” Not true for all students.

“Offline learning is better for discipline.” One-sided opinion without evidence.

Rewritten Unbiased Paragraph:

Online and offline learning both have their own advantages for college students. Online learning provides flexibility and allows students to study from different locations, which is helpful for those with busy schedules. Offline learning, on the other hand, supports face-to-face interaction and practical activities that are important in many subjects. The effectiveness of each method depends on the student's learning style, the subject being taught, and the learning environment. A balanced use of both methods can help students gain a better understanding and convenience. Online tools can support theory learning, while classroom teaching can enhance participation and hands-on experience.

Practical 11: Compare AI vs Human Writing

Aim - To compare AI-generated content with student-created content.

Objectives

- To identify difference in writing
- To understand AI limitations

Procedure

1. Write paragraph manually – Compose a paragraph yourself using your own ideas, wording, and structure on the selected topic.
2. Generate same topic using AI – Use an AI tool to produce another paragraph on the same topic for comparison.
3. Create comparison table – Organize both paragraphs side-by-side in a table to compare style, clarity, tone, and content differences.

Human-Generated Paragraph

Will AI Replace Jobs or Change Them?

Artificial Intelligence is becoming a major part of our daily lives, and many people are worried that it might replace human jobs. In my opinion, AI will not completely replace jobs but will definitely change the way people work. Some repetitive and simple tasks may be automated, which can reduce the need for manual labour. However, new types of jobs will also be created in areas like data analysis, programming, AI maintenance, and digital services. People will need to learn new skills to work with AI tools. Instead of taking away work, AI will make jobs faster, easier, and more efficient. Humans will still be needed for creativity, decision-making, and teamwork.

AI-Generated Paragraph

Artificial Intelligence is transforming industries by automating many tasks that were previously done by humans. While some jobs may be replaced, AI is more likely to change the nature of work rather than eliminate it completely. Routine activities such as data entry, basic customer support, and repetitive manufacturing can be handled efficiently by AI systems. However, new roles will emerge in fields like machine learning, robotics, cybersecurity, and AI supervision. Instead of removing opportunities, AI will help employees become more productive by reducing workload and improving accuracy. The future will involve humans and AI working together to achieve better results.

Limitation of AI :-

1. Lack of Human Intelligence

AI cannot think, reason, or understand like humans. It works only on predefined rules and data.

2. No Emotions or Creativity

AI has no emotions, feelings, or original creativity. It cannot make emotional or ethical decisions on its own.

3. Dependency on Data

AI systems require large amounts of accurate data. Poor or biased data leads to incorrect results.

4. High Cost of Development

Developing, training, and maintaining AI systems is expensive and requires advanced infrastructure.

5. Limited to Specific Tasks

AI is good at performing specific tasks but cannot perform multiple unrelated tasks like humans.

6. Lack of Common Sense

AI does not understand real-world situations or common sense unless explicitly programmed.

7. Job Displacement

Automation through AI can replace certain jobs, leading to unemployment in some sectors.

8. Security and Privacy Risks

AI systems can be misused for cybercrime, surveillance, or data privacy violations.

9. No Moral or Ethical Judgment

AI cannot judge what is morally right or wrong; it follows instructions without ethics.

10. Requires Human Supervision

AI systems still need humans for monitoring, updates, and decision validation.

Practical 12: NotebookLM Project

Aim - To create revision notes using NotebookLM.

Objectives

- To generate study guide
- To create flashcards

Procedure

1. Create NotebookLM project – Start a new project in NotebookLM to organize your materials and AI-generated outputs in one workspace.
2. Upload two resources – Add two documents or sources to the project so the AI can analyze and reference them.
3. Generate study guide – Use NotebookLM's tools to create a structured study guide summarizing key concepts from the uploaded resources.
4. Generate flashcards – Automatically produce flashcards that highlight important facts, terms, or ideas for easier review.
5. Review accuracy – Carefully check the summaries and flashcards to ensure all information is correct and reflects the original resources.
6. Take screenshots – Capture screenshots of the study guide and flashcards to document your work or include them in your submission.

Output :-

The screenshot shows the NotebookLM interface with the title "JavaScript Event Handling and Dynamic DOM". The left sidebar contains a "Sources" panel with a search bar and a list of sources, including "Event Handling and DOM Ma...". The main content area is divided into two sections: "Chat" and "Studio > Report". The "Chat" section displays a source text snippet about "Event Handling and DOM Manipulation" and a chat input field. The "Studio > Report" section shows a "Study Guide: Event Handling and DOM Manipulation" based on 1 source. It includes a "Quiz: Short-Answer Questions" section with four questions and a "Good report" button.

The screenshot shows the NotebookLM interface with the title "JavaScript Event Handling and Dynamic DOM". The left sidebar contains a "Sources" panel with a search bar and a list of sources, including "Event Handling and DOM Ma...". The main content area is divided into two sections: "Chat" and "Studio > App". The "Chat" section displays a source text snippet about "Event Handling and DOM Manipulation" and a chat input field. The "Studio > App" section shows an "Events Flashcards" app based on 1 source. It features a flashcard with the question "What is the term for the process of responding to actions performed by the user or the browser?" and a "See answer" button.

The screenshot shows the NotebookLM interface with the title "JavaScript: Events and DOM Manipulation Mastery" based on 1 source. The main content area displays a mind map diagram. The central node is "Event Handling & DOM Manipulation", which branches into three sub-nodes: "Event Handling", "Dynamic DOM Creation", and "Event Delegation". Each sub-node has a right-pointing arrow. At the bottom, there are "Good content" and "Bad content" buttons.

Practical 13: Excel Student Result Management

Aim - To analyze student marks using Excel tools.

Objectives

- To apply Excel formulas
- To create charts

Procedure

1. Enter student data – Input students' names, marks, and other required details into the spreadsheet.

2. Use Flash Fill – Apply Flash Fill to automatically complete patterns such as separating names or formatting data.

3. Replace incorrect values – Identify errors and use Find & Replace or manual correction to fix inaccurate entries.

4. Calculate pass/fail using IF – Create an IF formula to determine whether each student passes or fails based on their score.

5. Use COUNTIF and AVERAGE – Apply COUNTIF to count specific results and AVERAGE to compute the class's mean score.

6. Create charts – Generate visual charts to represent student performance trends or score distributions.

7. Apply conditional formatting – Use color-based formatting to highlight important values, such as low scores or top performers.

Output :-

The screenshot shows an Excel spreadsheet titled 'Student Result Management'. The data is organized in columns: Name, first name, last name, Roll No, Class, City, Marks (ENGLISH), Marks (MATHS), Marks (SCIENCE), total marks, and remarks. Conditional formatting is applied to the 'marks' columns, with red highlighting used for scores below 50 and green for scores above 80. The 'remarks' column contains 'pass' or 'fail' based on the total marks.

Name	first name	last name	Roll No	Class	City	Marks (ENGLISH)	Marks (MATHS)	Marks (SCIENCE)	total marks	remarks
Rahul Verma	Rahul	Verma	1	9	Delhi	78	82	75	235	pass
Neha Sharma	Neha	Sharma	2	9	Jaipur	85	10	88	183	pass
Aman Khan	Aman	Khan	3	9	Lucknow	90	92	86	268	pass
Pooja Patel	Pooja	Patel	4	9	Surat	50	10	40	100	fail
Suresh Das	Suresh	Das	5	9	Delhi	88	84	79	251	pass
Ankit Singh	Ankit	Singh	6	9	Patna	20	10	20	50	fail
Riya Gupta	Riya	Gupta	7	9	Noida	92	89	94	275	pass
Mohit Jain	Mohit	Jain	8	9	Indore	81	77	85	243	pass
Sneha Iyer	Sneha	Iyer	9	9	Chennai	90	88	91	269	pass
Karan Mahotra	Karan	Mahotra	10	9	Chandigarh	74	79	82	235	pass
Aditi Rao	Aditi	Rao	11	9	Bengaluru	86	83	88	257	pass
Nikhil Pawar	Nikhil	Pawar	12	9	Pune	89	91	87	267	pass
Simran Kaur	Simran	Kaur	13	9	Delhi	80	85	78	243	pass
Arjun Mehta	Arjun	Mehta	14	9	Mumbai	93	90	92	275	pass
Kavya Nair	Kavya	Nair	15	9	Kochi	87	84	89	260	pass

The screenshot shows the same Excel spreadsheet with an additional column 'average' added. The 'average' column contains the average of the three subject marks for each student. Summary statistics are provided in the right margin: 'count of delhi students' is 3, 'max' is 275, and 'min' is 50.

Name	first name	last name	Roll No	Class	City	Marks (ENGLISH)	Marks (MATHS)	Marks (SCIENCE)	total marks	remarks	average
Rahul Verma	Rahul	Verma	1	9	Delhi	78	82	75	235	pass	78.33333333
Neha Sharma	Neha	Sharma	2	9	Jaipur	85	10	88	183	pass	61
Aman Khan	Aman	Khan	3	9	Lucknow	90	92	86	268	pass	89.33333333
Pooja Patel	Pooja	Patel	4	9	Surat	50	10	40	100	fail	33.33333333
Suresh Das	Suresh	Das	5	9	Delhi	88	84	79	251	pass	83.66666667
Ankit Singh	Ankit	Singh	6	9	Patna	20	10	20	50	fail	16.66666667
Riya Gupta	Riya	Gupta	7	9	Noida	92	89	94	275	pass	91.66666667
Mohit Jain	Mohit	Jain	8	9	Indore	81	77	85	243	pass	81
Sneha Iyer	Sneha	Iyer	9	9	Chennai	90	88	91	269	pass	89.66666667
Karan Mahotra	Karan	Mahotra	10	9	Chandigarh	74	79	82	235	pass	78.33333333
Aditi Rao	Aditi	Rao	11	9	Bengaluru	86	83	88	257	pass	85.66666667
Nikhil Pawar	Nikhil	Pawar	12	9	Pune	89	91	87	267	pass	89
Simran Kaur	Simran	Kaur	13	9	Delhi	80	85	78	243	pass	81
Arjun Mehta	Arjun	Mehta	14	9	Mumbai	93	90	92	275	pass	91.66666667
Kavya Nair	Kavya	Nair	15	9	Kochi	87	84	89	260	pass	86.66666667

Practical 14: Sales Data Workbook

Aim - To analyze sales data using Excel formulas and charts.

Objectives

- To use SUMIF formulas
- To filter categories

Procedure

1. Enter or import sales data – Add sales records manually or import them from an external file to build your dataset.
2. Sort and filter – Organize the data by sorting and apply filters to focus on specific products, dates, or regions.
3. Use SUMIF – Apply the SUMIF function to total sales based on a chosen condition, such as product type or salesperson.
4. Extract text using LEFT/RIGHT – Use LEFT or RIGHT functions to pull specific characters from product codes or IDs.
5. Create line chart – Plot a line chart to visualize sales trends over time for clearer analysis.
6. Protect sheet – Lock the sheet or specific cells to prevent unauthorized edits and maintain data integrity.

Practical 15: Personal Financial Planner

Aim - To prepare a personal financial planner using Excel.

Objectives

- To track expenses
- To compare budget vs actual

Procedure

1. Enter expenses – Record all expense items with their categories, dates, and amounts in the spreadsheet.
2. Apply Data Validation – Set validation rules to restrict inputs, such as allowing only numbers or predefined categories.
3. Use SUMIF – Use the SUMIF function to total expenses by category or any specific condition you choose.
4. Create budget sheet – Design a separate sheet comparing planned budgets to actual spending for better tracking.
5. Highlight expenses above limit – Apply conditional formatting to automatically mark entries that exceed your budget limit.
6. Create charts – Generate charts to visually present spending patterns, category breakdowns, or monthly totals.
7. Adjust print settings – Modify page layout, scaling, and margins to ensure the sheet prints clearly and fits on the page.
